INDEX to CONTENTS

TO VOLUME 64

August 4th, 1941 to July 27th, 1942

Many bind volumes of THE CANNING TRADE, others file each issue so that when reference to certain important subjects is desired, consulting the index in the last number of the volume will save a lot of unnecessary thumbing.

The markets are not indexed because they refer to current market activity. To know the condition of the market at a certain time, it is only necessary to refer back to THE CANNING TRADE of that date.

"Crop Reports" and "Grams of Interest" are not indexed for much the same reason, as can be readily understood.

The index for Volume 64, issues dated August 4th, 1941, to July 27th, 1942, follows:
